Subject Index Volume 71 (1999)

Algorithms 9, 49, 87, 91, 187, 199, 205
Analysis of algorithms 17, 135
Approximation algorithms 17
Automatic theorem proving 75

Bipartite graphs 149
Bivalency 155
Boolean functions 149
Broadcasting 81
Broadcasting with selective reduction 71
BSR PRAM model 43
Byzantine failures 35

Case grammar 29
Cells 179
Center 205
Combinatorial designs 35
Combinatorial problems 97, 107, 149, 183
Complement representation 159
Computational complexity 5, 55, 63, 75, 127, 159
Computational geometry 179, 221
Computational problems in integer lattices 55
Concurrency 229
Consensus 155
Correlation immunity 149
Counter machine 193
Cryptographic algorithm 141
Cryptography 1, 149

Data structures 97, 199, 213
Databases 115
Deflection routing 235
Delaunay triangulation 221
Diameter 205
Distributed computing 81, 141, 155
Distributed systems 35
DP procedure 75

Family of sets 199
Fault tolerance 81, 155, 167
Flowshop scheduling 49
Folded cube 87
Formal languages 107, 175

Functional dependency 115
Furthest neighbor 205

Graph coloring 135
Graphs 9
Ground instance 159
Ground term 159
Group-oriented cryptography 1

Hypercube 81, 87
Hyperplane arrangements 179

Inclusion dependency 115
Information retrieval 29
Integer partitions 141
Interconnection network 87
Isoperimetric problem 81

k-compaction problem 43

Lattice 199
Linear error-correcting codes 55
Logical implication 115
Lower bound 155, 187

Matrix languages 175
Maximum independent set 135
Mesh connected computer 235
Message-passing 91
Model of parallel computing 71
Multiport 91

Nonpreemptive scheduling 17

Packet routing 235
Parallel algorithms 43, 71, 91, 183
Parallel processing 23, 235
Parallel random access machines 9
Path matching 9
Permutation realization 23
Permutation routing 235
Perturbation 221
PRAM 183
Prefix computation 91

Elsevier Science B.V.

Program correctness 229
Program equivalence 193
Program scheme 193
Programming calculi 229

Quantum computing 5
Quorum systems 35

Randomized algorithms 187
Rearrangeable graph 23
Rearranging scattered information 43
Recognition algorithm 87
Reducibility among approximation problems 55
Relation 115
Relational database 29

SAT 75
Scheduling 127
Selection 183
Semantic Vector Space Model 29
Series parallel graphs 9
Shared object implementation 167
Slender languages 175
Sum coloring 135
Synchronous system 155

Temporal aggregation 213
Temporal databases 213
Term 159
Theory of computation 55, 63, 193
Threshold signature 1
Tree precedence relation 127
Two-agent mutual search 187

Upper bound 187

Vector Space Model 29

Wait-free 167
Weighted cactus graphs 205
Worm routing 235
Worst-case analysis 49
